March Together for
a successful future*

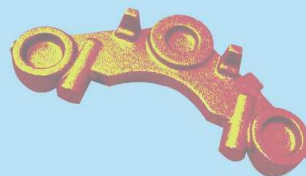

FORGING TECH FORUM

Let Us Join Hands

**CREATE A STRONG PLATFORM
FOR FORGING INDUSTRY**

WELCOME

To

FORGING TECHNOLOGY FORUM

Forging Industry is growing quite satisfactorily mainly due to the automobile industry. Many International Sourcing people are looking at India as a main sourcing hub. However Forging Industry has to achieve quality and delivery requirements. In addition to be more competitive. This can be achieved only through improved productivity and quality. The price reduction is possible through automation and technological upgradation.

To achieve this, upgradation of Plant & Equipment, Technology Development, Enhancement of Knowledge, Innovations and Training of Manpower are the critical and essential factors. One needs to remain in touch with the latest developments in the Forging field globally.

A few years back, a small group of likeminded enthusiastic and dedicated people from industry, came together to form Forging Tech Forum.

Now we invite every one concerned with this industry to extend support to the Forum becoming member. This will help make it better and stronger.

Welcome To
FORGING TECHNOLOGY FORUM
